OUR STORY	19-20

Topdeck Solid Timber

Topdeck Solid Timber represents the pinnacle of authenticity, crafted from **100% natural hardwood** for those seeking flooring with character and lasting appeal. Available in both raw and pre-finished options, the range offers complete freedom — whether you prefer the timeless elegance of site-finished boards or the convenience of factory coatings. Each plank is milled from a single piece of premium timber, delivering the richness and durability that only natural hardwood provides.

Sourced from sustainably managed forests, the collection features iconic Australian species alongside select international favourites. Presented in **Standard & Better** grade, every board showcases unique variations in grain, tone, and texture — a natural diversity that forms the foundation for interiors blending tradition with contemporary style.

Designed to perform as beautifully as it looks, our pre-finished timbers are treated with advanced **UV lacquer coatings** for lasting protection against daily wear. For those who prefer raw boards, onsite finishing allows limitless scope for colour, sheen, and style. In both forms, Topdeck Solid Timber ensures strength, stability, and a seamless connection to nature underfoot.

More than just flooring, Topdeck Solid Timber defines elevated spaces — crafted with care, grounded in authenticity, and enriched by a legacy that grows more beautiful with time.
